

SOUMIK CHATTERJEE

Chief of Staff | AI-Native Business Pipelines Architect

Kolkata, India | soumik@cosmik.work | cosmik.work | linkedin.com/in/cosmikwork | github.com/pymikofficial

10 years across enterprise software (Accenture), global ed-tech operations (CampK12), social impact (Teach For India), and founder-stage businesses (God Crew, Navgurukul). I build the operating layer so the founder can build the company. Currently operating independently under cosmik.work, where I have shipped 11 AI-powered business tools live in production.

SIGNATURE PROOF POINTS

- 9 B2B pipelines built from zero in 90 days** generating a \$1.47M CAD prospect pipeline across 2,314 CRM contacts and 924 companies.
 - 260% of placement target at Navgurukul:** 65 verified JDs delivered in 60 days against a target of 25, across 2,093 companies contacted.
 - 90%+ client retention** across US, UAE, and India markets over 3 years at CampK12, managing a global cohort of coding instructors.
 - 11 AI-powered business tools shipped and live** at cosmik.work, including Fullshot on the Chrome Web Store and a Build Timer CLI.
 - 3 production AI workflows built in Make.com** (outreach sequencer, lead qualifier, support triage) using Claude and OpenAI as the reasoning layer.
 - Python automation at Accenture** reduced post-deployment defects by 15% across the Bank of America codebase.
-

PROFESSIONAL EXPERIENCE

Independent Chief of Staff Contractor Feb 2026 - Present

CosmikWork AI Automations | Remote

Operating independently under cosmik.work, building and shipping AI-powered business systems for founders. Two concurrent engagements below.

Executive Assistant / Chief of Staff Feb 2026 - May 2026

God Crew | Toronto, Canada (Remote)

- Built and governed 9 parallel B2B pipelines simultaneously, maintaining data integrity across 2,314 CRM contacts and a \$1.47M CAD prospect pipeline.
- Delivered 57 warm leads from 490 LinkedIn outreach contacts (11.6% conversion) through systematic list hygiene and segmentation.
- Built 3 production AI workflows in Make.com for outreach sequencing, lead qualification, and support triage, using Claude and OpenAI as the reasoning layer.
- Authored 9 SOPs covering outreach, qualification, and handoff workflows; adopted as the team operating standard across founder, EA, and developer.
- Built godcrew.com/gold autonomously using Next.js and Supabase via Claude Code. Rated 9/10 on communication by founder.
- Placed Akash: a single strategic hire who built a voice AI tool that replaced an entire planned salesforce.

Placement Outreach Manager Mar 2026 - Apr 2026

Navgurukul Foundation | India (Remote)

- Built employer outreach pipeline from scratch: 2,093 companies contacted, 65 verified JDs delivered in 60 days against a target of 25 (260% of target).
- Managed 3 interns across LinkedIn, Apna, and Indeed; drove 73.9% JD approval rate with daily quality gates.
- Designed tracking dashboards and weekly metrics reports for leadership; built May scaling plan projecting 100+ JDs.

Fellow Leader Apr 2024 - Mar 2026

Teach For India | Kolkata, On-site

- Led execution and reporting for high-accountability academic initiatives across multiple stakeholders under tight resource constraints.
- Operated in high-ambiguity environments: imposed structure, extracted signal, and drove consistent outcomes across a 2-year fellowship.

Technical Recruitment & Client Success Manager Mar 2020 - Apr 2023

CampK12 | Remote (India / US / UAE)

- Managed end-to-end recruitment and account operations across US, UAE, and India markets; maintained 90%+ client retention over 3 years.

- Managed a global cohort of coding instructors (Python, AI, Data Science), matching technical expertise to client learning objectives.
- Reduced manual pipeline management time by 30% through automation during a 3x team growth phase.
- Used LeadSquared CRM at scale to manage candidate pipelines, client communications, and account workflows.

Senior Software Engineering Analyst Apr 2015 - Mar 2019

Accenture | Kolkata, Hybrid

- Served as technical bridge between US and UAE enterprise clients (UCI Hospital, Bank of America) and engineering teams.
- Built Python automation frameworks for Bank of America, reducing post-deployment defects by 15%.
- Managed cross-geography client relationships across technical and non-technical stakeholders in IST/EST/PST time zones.

COSMIK.WORK PORTFOLIO (11 TOOLS, ALL LIVE IN PRODUCTION)

Automation Priority Sorter, Contract Generator, Fieldnote, Executive Briefing Generator, Meeting Minutes Extractor, SOP Generator, Investor Update Drafter, Cold Outreach Personalizer, Hiring Screener, GitHub Profile Summarizer, Fullshot (Chrome Web Store), Build Timer (CLI).
